

BOWHEAD SYSTEMS MANAGEMENT

Agile, Innovative, and Responsive Partner

Bowhead Systems Management, LLC (BSM) offers expertise in engineering, maintenance and support of training devices, testing of unmanned aerial vehicles and technology networks.

BSM excels in support of advanced training devices, testing of unmanned aerial vehicles, implementation of computer networks, and development of software engineering solutions. Our proven past performance shows a broad spectrum of experience which we bring to meet our customers' training, engineering and information technology needs.

Key Capabilities

- Full Lifecycle Software Development
- JAVA, C++, NET, COBOL, ColdFusion
- Full Section 508 Support
- Mobile Application Development
- Program Management
- Training and Simulation Engineering
- Information Technology Engineering
- Systems Engineering
- Network Security
- Disaster Recovery Planning
- Chemical, Biological, Radiological, Nuclear, Explosives
- Comprehensive Risk Management
- Antiterrorism and Force Protection Services
- Continuity of Operations Planning
- Visual Information Engineering
- Secure Video Teleconferencing
- International Traffic in Arms Regulations

Services

- Software Development
- Section 508 Support
- Training and Simulation
- Risk Management
- Continuity of Operations
