

BOWHEAD MANUFACTURING TECHNOLOGIES

From Concept to Delivery

Bowhead Manufacturing Technologies, LLC (BMT) is an Alaska Native 8(a) Small Disadvantaged Business with manufacturing technologies that range from light mechanical manufacturing and electromechanical to full system integration.

BMT provides comprehensive engineering solutions from concept through design, providing our customers a complete Technical Data Package (TDP). We offer engineering and product development, with light manufacturing capabilities, along with key partnerships to provide additional production capacity and capabilities where required. Bowhead designs and builds to customer's specification or to a customer's own (build to print) TDP.

BMT is ISO 9001-2008 certified with a management pool that includes over 60 years' experience- specifically in precision manufacturing for the United States Government and other commercial customers. Bowhead's effective team consists of skilled, experienced manufacturing professionals, proven suppliers and subcontractors, management oversight, and corporate support as needed.

BMT's experience of leadership in Operations, Plant Management and Business as a Military defense contractor offers the guidance necessary to provide complete manufacturing solutions to our customers from concept to delivery.

Experience includes manufacturing of the following:

- Airborne and Ground Based On-Board Computers
- Microwave Assemblies
- Hybrids
- System Integration and Environmental Test
- SMT and Through-Hole PWBA's
- Harness and Cable Assemblies

Certifications

AS9100D and ISO 9001:2015

Services

- Electro — Mechanical Assembly
- Avionics Assembly
- Product Testing and Validation
- Prototype Manufacturing
- COTS Configuration and Modification
