

BOWHEAD COMMUNICATIONS SERVICES

Base Telecommunications Services

Bowhead
A UIC Alaska Native Corporation

Bowhead is dedicated to providing telephone communications operations and maintenance on military installations.

We are focused on providing the U.S. Government all personnel, equipment, tools, materials, vehicles, supervision and other items and services to ensure the Base Telecommunications System (BTS) is available 24 hours per day, 7 days per week. This consists of maintaining and operating the base telephone system switch, the outside and inside plant systems, network, transmission systems and all associated equipment.

Our management and technicians are experienced in all phases of the BTS. The management team worked in the government service contracting market for over 40 years.

Our company prides itself on providing certified technicians for the maintenance of a variety of base telephone switches. We currently provide service on Nortel and AVAYA switches and maintain teams of technicians that are certified in splicing of copper and fiber as well as installation and layout design. Bowhead conducts the total outside plant maintenance from installing fiber rings, installing manholes and splices, and connectivity. In addition, we install complete new building infrastructures from the construction phase to the final customer dial tone.

Bowhead's CPAR ratings from the Government are exceptional and demonstrate that our experience in contracting, performance, and management is unsurpassed by any other Base Telephone Contractor.

Key Capabilities

- Base Telephone Support
 - Inside/Outside Plant
 - Switch
- Wired and wireless networks
- Video conferencing
- Satellite communications: Satellite phone and Satellite Internet access
- Internet connectivity
- Optical fibers, optical communications, coaxial cable, CAT 5, 7 and X installation
- VoIP and Digital communication systems
- Wired/Wireless Phone systems
- Hosted Communications systems
- Communication interoperability
- Telephone systems sales and installation
- Security systems sales and installation
- Low voltage cable sales and services
- Communication service level agreements services
